

Introducing the robust, advanced SW3100:

- ✓ **Game changer** in horticultural weed control practices.
- ✓ **Improved functionality** and tested through multiple pilot projects.
- ✓ **Teamed up with the right** accessories and attachments, it is your trusted friend for organic, chemical free weed control.
- ✓ **Reliable and trustworthy** for years of continuous, every-day use.
- ✓ **Safe** to be used around your people, organic produce and animals.

Model Specifications:	SW3100
Satusteam™ Volume	30-35L / min
Satusteam™ Pressure (in heat exchanger)	35 Bar (500 PSI)
Satusteam™ Pressure (on delivery)	2-4 Bar (30-60 PSI)
Satusteam™ Temperature:	118°C (250°F)
Water Pump	
Open Flow	55L / min
Max Pressure	40 Bar (580 PSI)
<ul style="list-style-type: none"> • Triple diaphragm PTO Drive Pump • Adjustable Pressure Unloader 	
Diesel burner (12V)	
Fuel Consumption	15 L / hr
Fuel Tank Capacity	120 L
BTU Rating	760000 Btu
Fuel Oil Solenoid	Standard
Exhaust Stack	200mm

*Note: the consumption figures are a guide-only.

Key Highlights

Fast track your productivity

With the SW3100 weed control system at your disposal, those invasive weeds don't stand a long term chance.

Built for intensive horticulture

Ideal for weed control in intensive horticulture, where continuous flow of delivery from a vehicle mounted (tractor or trailer) applicator head is required. The SW3100 can operate single or dual rowtech head(s) and an orchard head upto 1.2m width, single side.

No spray drift, no worries!

Weedtechnics applicator heads are carefully engineered to have the maximum effect of Satusteam™ on those annoying weeds. All the white clouds you create are just chemical free steam. It is even safe to use your treated area immediately.

Feel empowered

Weed control with a Satusteam™ machine gives you more time in your hands to dedicate to the things you love. Keep those pesky weeds at bay without breaking your back or stressing your arms!

Our patented Satusteam™ technology offers a safe zone for everybody - far removed from the obvious harmful effects of poisonous herbicides. Research confirms that Weedtechnics Satusteam™ weed control systems are 3x faster than hand weeding and leaves no toxic residues.

Customer Speak

Overall, I think this weed killing technology from Weedtechnics is an excellent product- it is environmentally friendly compared to traditional chemical weed control applications, results are faster and it is much safer for the operator.

Andrew Tullock | Landscape Contractor Magazine, Australia

We tried various organic methods like pelargonic acid, pine oils and mechanical weeding but the machines from Weedtechnics were far more practical and efficient. We have been receiving lots of positive feedback from the public.

Andy Morgan | Weedsteamers

What's your Satusteam™ solution?

We specialise in creating 'bespoke solutions' for weed control. We listen to your weed problems, analyse your concerns and design a custom solution that is special for you. With top-notch customer service and technical support, you are in for a life-changing experience. We recommend undergoing safe operations, maintenance and productivity training for 1st time machine owners.

The SW3100 Options:

Custom trailer - the 'Sumo'

Order a customised trailer perfectly fitted for the SW2100, 4000 litre tank, inlet & outlet reels, hoses & gun. It is the complete, ready-to-go package.

Orchard Head & hydraulic arms

The SW3100 has the ability to run the Weedtechnics Orchard Head & hydraulic arms, perfect for treating orchard rows. The hydraulic arms give the ability for the Orchard Head to move in any direction necessary, allowing you to get extremely close to the base of the trees, and conquer any obstacles that get in the way. The result, a massive increase in efficiency.
